Coordination with State Government

- 1) Mention any problem faced during coordination with state government
Initially the state government took lots of time to notify the process, but the rapport now with the state government is excellent. The state government is regularly supervising the process and also provides the state nodal agency and other implementing agencies with required Govt Orders
- 2) Any motivating factor during coordination
- 3) Any other

15. Coordination with District and block level health department

1. Areas where there was excellent support and coordination
District administration in all the CBM pilot districts is very supportive and the deputy commissioners of the respective districts showed personal interest and also facilitate the process of rolling out.
2. Areas where there were low support
Health department officials are little skeptical about the process.
3. What were the key factors for high support
Good rapport of Nodal and implementing agencies, State mentoring group and state resource group with district administration and health officials.
4. What were the reasons for low support
5. Suggestions for improving support and cooperation from Block and district health officials
